

5/21/90

Dear FTM,

Here is a new letter from Holland. I have had a lot of reactions from readers of the FTM magazine. I have so much letters to write, so I didn't have time to write earlier to you.

If there are some guys, who have wrote a letter to me, but who didn't have any reaction, please write me again. Sometimes there will go something wrong with the post. So I received a letter from someone in England who seems to have changed his adress. So I'm very sorry if someone takes time to write to me and got no response.

Our group is very intersting to hear about the people in other countries. There are a lot of people who are reading the magazine on our meetings, because I always will take it with me to a meeting. We have every two months a meeting. A lot of people do think it's not enough when we have meetings every three months.

It's always a great pleasure to see the folks again. The next time we will discuss the item: "Why do we grow old so fast."

This item has my interesting, because just then years ago, when I was 25 years I looked 18 years. Now I am 36 years and I look 36 years old, but I feld like 50 years. I have seen so much in my little world, a lot more than other people of my age. This phenomen is well-concious by a lot people of our group.

How do you feel this? Perhaps someone will write about this item? Are there more people who have the feeling to have became a grown-up in a very short time? I'm very anxious to hear from you. I have to send you very kindly greetings from our Mannengroup. Please note the changes in my telephone-number.

Jean van Aarle
